Frontend Developer

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience specializing in JavaScript, TypeScript, React, and Next.js. Proven ability to build data-rich dashboards and high-performance web applications with real-time data integration, from fintech and trading platforms to admin configuration tooling. Experienced with Redux/RTK Query, testing with Jest and Cypress, and CI/CD workflows with Docker. Active open source contributor skilled in cross-functional collaboration and code review.

WORK EXPERIENCE

Frontend Developer

Finaract November 2025 – Present | | Nigeria (Remote)

- Architected and delivered Fidelity Bank's virtual account merchant platform and admin dashboard using Next.js, enabling seamless digital payment processing with real-time transaction tracking and automated reconciliation for merchants
- Engineered the NIBSS (Nigeria Inter-Bank Settlement System) admin portal to streamline payment terminal certification, BVN validation workflows, and inter-bank settlement operations across Nigeria's financial infrastructure
- Worked with SQL-backed reporting views and Dockerized CI/CD pipelines to ship dashboard features reliably across environments
- Collaborated on developing UTM Offshore's FLNG project website showcasing Nigeria's first floating liquefied natural gas facility, implementing responsive design and optimized performance to present the \$5B energy infrastructure project to investors and stakeholders

Frontend Developer

Mass Axis January 2025 – November 2025 | | United States (Remote)

- Collaborated on developing a robust CRM platform with intuitive user interfaces and real-time analytics dashboards to streamline sales pipeline management
- Engineered an admin configuration panel enabling seamless management of user roles, permissions, and automated workflows
- Managed complex client and pipeline state with Redux and RTK Query, and integrated advanced features including bulk SMS, click-to-call, and real-time data syncing
- Wrote unit and end-to-end tests with Jest and Cypress as part of the delivery workflow, improving regression safety across dashboard releases
- Optimized frontend performance and accessibility with responsive design supporting both light and dark modes

Frontend Developer

Tradaholic February 2024 – February 2025 | | United States (Remote)

- Engineered a comprehensive trading platform using Next.js and TypeScript with real-time data visualization and interactive features
- Built and optimized trading dashboards with real-time market data visualizations and streamlined order-entry workflows
- Achieved 25% increase in user engagement and 35% reduction in average page load times
- Designed intuitive user onboarding experience with interactive tours and educational components, resulting in 25% increase in new user activation rate

Frontend Developer

AremxyPlug March 2022 – February 2024 | | Nigeria (Remote)

- Designed and implemented airtime recharge page and led development of the "AremxyPlug" platform using ReactJS and Tailwind CSS
- Enabled seamless SIM card recharges and secure money transfers among registered users

- Developed Sales and Transactions flow using ReactJS, React Hooks, and Context API for secure and efficient user-to-user money transfers
- Built super admin dashboard using Svelte, demonstrating proficiency in modern frontend frameworks for enhanced state management and component reactivity

FREELANCE PROJECTS (KIILOO)

- **Proplinqr** (proplinqr.com): Real estate platform; built the frontend in React/Next.js and TypeScript, covering property listings, search, and responsive UI for a proptech startup
- **Perfect Kings Kiddies** (perfectkingskiddies.com): Children's e-commerce store; delivered the storefront end-to-end under the Kiiloo brand, coordinating a backend subcontractor and handling client delivery

OPEN SOURCE

- **Outreachy Intern, rust-lang/a-mir-formality** (2026): Contributing to the Rust language's formal model under mentorship of Niko Matsakis; merged PRs through rigorous community code review in a distributed team
- Contributor to Wikimedia Toolforge projects and Stellar/Soroban smart contract tooling (GitHub: System625)

EDUCATION

Landmark University September 2019 – August 2023
BSc, Computer Science Omu-Aran, Kwara State, Nigeria

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, SQL, Python, Rust
- **Frontend Frameworks:** React, Next.js, SvelteKit
- **State & Data:** Redux, RTK Query, React Hooks, Context API
- **Testing:** Jest, Cypress
- **Styling & Design:** CSS, TailwindCSS
- **DevOps & Tools:** Docker, CI/CD pipelines, Git, GitHub, VS Code, Cursor
